DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of Group I, claims 1-11, 26 and 28 in Paper No. 9 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 28 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. It is unclear what is meant by "predetermined carrier/a visual code...". Correction is required.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 1-11, 26 and 28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Hoover (4,943,939) in view of Cho et al. (5,672,170). Hoover discloses surgery using a surgical instrument accounting method (which uses bar codes, audible signals, and two sites) however fails to disclose a syringe as one of the

surgical instruments. Cho et al. teaches the use of a syringe as a surgical instrument during heart surgery for revascularization (col. 1, lines 25-28). It would have been obvious to one of ordinary skill in the art to combine the teaching of the use of a syringe as a surgical instrument during heart surgery, as taught by Cho et al., with a surgical instrument accounting method as per Hoover, for revascularization.

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Thomas C. Barrett whose telephone number is (703) 308-8295.
